

Green Product Directory

Information for
Listing of Product Manufacturers and Suppliers

Introduction

The Build It Green Product Directory provides a reliable tool for building professionals and the general public to conveniently locate suppliers and service providers of green building products within the 9-County San Francisco Bay Area and Anaheim. Listed products must meet criteria for energy efficiency, resource conservation, or indoor environmental quality. These criteria are consistent with measures referenced in these guidelines:

- Home Remodeling Green Building Guidelines
- New Home Construction Green Building Guidelines
- Bay-Friendly Landscape Guidelines
- Multifamily Green Building Guidelines
- LEED Green Building Rating System

Evaluation Process

The Technical Review Committee oversees the Green Product Directory program and ensures the quality and integrity of listed content by critically evaluating products for potential inclusion in the Directory. Where possible, standards from credible third party organizations are used to screen products. In cases where third party standards do not exist, the Technical Review Committee discusses potential screening criteria and establishes criteria based on the best information available. Additional technical experts are consulted when needed.

Application for Listing

The Green Product Directory is regularly updated to reflect the local availability of products, introduction of new products, and other new information. Please use the appropriate form outlined below to apply for listing in the Directory. Build It Green will contact the applicant within two weeks of receipt of the application to discuss the submission.

Product Manufacturer:

To nominate a green building product for potential inclusion in the Green Product Directory, please complete [Form A](#).

Product Supplier (Distributor, Wholesaler, Retailer):

To nominate a supplier of green building products for potential inclusion in the Green Product Directory, please complete [Form B](#). The business must be located within the 9-County Bay Area.

Service Provider (Contractor, Installer):

To nominate a service provider of green building products for potential inclusion in the Green Product Directory, please complete [Form B](#). The business must offer services within the 9-County Bay Area.

Note: Bay Area counties include Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, & Sonoma.
