

2008 Builder Workshops

August - November 9 am to 12noon

Green / High Efficiency New Homes: Current & Upcoming Energy Codes, Green Standards, Utility Incentives and Solar Programs

The Home Builders Association / Building Industry Association, Sacramento and Fresno Builders' Exchanges, various cities and PG&E are hosting a series of workshops for builders and developers of new residential projects.

Builders of new homes are dealing with a variety of changes in the industry. The changes include updates to the state energy code, adoption of green building standards by local government, changes to solar and energy efficiency PG&E incentives.

Attendees will get the latest information on these key topics; will be better prepared to take advantage of the various rebates and tax incentives; and build the type of home that the marketplace is demanding.

Workshop Dates & Locations:

August 14, San Ramon

August 26, San Jose

September 18, Santa Rosa

October 8, Stockton

October 28, Fresno

October 29, Bakersfield

November 12, West Sacramento
