

## **GreenPointRATED**

*Assurance that your remodel is healthy, efficient and green.*

Being green should mean living comfortably and sustainably. **GreenPoint Rated** helps you achieve your dream remodel and allows you to verify that it was done to proven green standards. With **GreenPoint Rated**, you can have a healthy and beautiful home, all while lowering costs and saving resources for the next generation.

## IT'S COMPREHENSIVE.

To ensure that every GreenPoint Rated home is healthy and efficient from the inside out, we evaluate homes in **five different categories:**

### Energy Efficiency

GreenPoint Rated homes use less energy and save money on your utility bills. And many GreenPoint Rated homes include upgrades that make them quieter and less drafty.

### Water Conservation

Whether you're doing a landscape redesign, bathroom, or kitchen remodel, GreenPoint Rated ensures that you use water more efficiently, lowering your water bills and preserving our state water supplies.

### Indoor Air Quality

Many commonly used building materials contribute to asthma and other ailments, but a GreenPoint Rated remodel helps you and your family breathe easier. Indoor air quality can be improved with low emitting finishes, ventilation and filtration practices.

### Resource Conservation

GreenPoint Rated homes use fewer of our precious natural resources than conventional homes. They also use longer-lasting materials, lowering maintenance costs and sparing both the environment and your pocketbook.

### Community

Every home is part of a neighborhood. From outdoor lighting that reduces light pollution, to laying gravel instead of cement for walkways, GreenPoint Rated homes make good neighbors.

## IT ADDS VALUE.

Ensuring that a home was built to a green standard can increase its resale value and lower its utility bills.

## IT'S OBJECTIVE PROOF.

The GreenPoint Rated label is quality assurance that your home is better for you and the environment. It proves that your home remodel was built to trusted environmental standards and evaluated by a certified GreenPoint Rater.

## GET AN EXTRA REWARD: REBATES ARE AVAILABLE.

Some counties are offering up to \$8,000 in energy and green home upgrades. Learn more at [EnergyUpgradeCA.org](http://EnergyUpgradeCA.org)

Alameda and Los Angeles Counties are offering additional rebates for earning the GreenPoint Rated label. For Alameda County go to [GreenPointRated.com/Rebates](http://GreenPointRated.com/Rebates). For Los Angeles County go to [EnergyUpgradeGreenLabel.org](http://EnergyUpgradeGreenLabel.org)

## IT'S EASY – GET STARTED TODAY.
