How did you score? Think your home is GreenPoint Ready? Visit **greenpointrated.com/get-rated** and find a Rater today!

* This survey is not a complete list of all the green features that GreenPoint Rated awards points for. If you're still not sure that your home qualifies, visit www.greenpointrated.com/get-rated and download our full checklist to see what additional points you can earn!

Getting Your Home

These simple steps will help

make the process of getting your

GreenPoint Rated label go as smoothly as possible.

1	
	_

Take the "Is Your Home GreenPoint Ready" survey.

- Take our simple survey to help you assess if your home could qualify for the label. Visit the "Get Rated" section at www.greenpointrated.com
- If you're working with a real estate agent, ask them if they are familiar with GreenPoint Rated and share the survey results with them. They may be able to refer you to a GreenPoint Rater and help to facilitate the process.

Call a GreenPoint Rater.

- Your GreenPoint Rater is a certified professional who will guide you through the rating process. You can find a list of GreenPoint Raters at greenpointrated.com in the "Get Rated" section. Things to remember when choosing a Rater:
- → The fees that GreenPoint Raters charge can vary greatly, so you may want to get a few bids before selecting one. There is also a small GreenPoint Rated application processing fee.
- → Ask about the GreenPoint Rater's list of credentials. You may want to choose a Rater who is also certified by the Building Performance Institute (BPI) so that you can have just one professional perform all of the required tests.
- Send the Rater your completed survey and review it with them by phone. Your Rater will ask you a few more questions to determine if your home qualifies for the label, and can suggest any additional green home improvements that may be necessary.
- If it looks like your home may qualify, schedule a walkthrough with the Rater.

Prepare for your GreenPoint Rating.

- Locate and provide clear access to your attic, crawlspace, and any heat registers that may be covered by furniture.
- Gather invoices, product information, and other documentation on your green products for your Rater to review.
- If you have a fireplace, remove all ashes.
- Complete the following information on your home to share with your Rater. Your Rater may ask you to send this information prior to the walkthrough date:

HOMEOWNER NAME							
ADDRESS							
What year was the home built?							
What type of heating system do you have?	FORCED AIR	RADIANT	OTHER				
Where is your heating system located?	BASEMENT CRAWLSPACE	GARAGE	ATTIC	SIDE OF HOUSE	OTHER		
Where is your water heater located?							
Where is you irrigation controller located?							
Where is your gas meter located?							
Do you have any reports on your home suc home inspection, termite, home performan			YES 1,	NO			

If yes, please list, and have them ready for your Rater to review:

Get Rated

- During this 2–5 hour rating process, your Rater will gather documentation, verify your home's green features, and conduct an Energy and HVAC Survey and Combustion Appliance Safety Test. The Rater may ask that you refrain from opening doors and windows or turning on the water for a portion of the walkthrough.
- Your Rater will then submit your paperwork to the GreenPoint Rated Program for processing. Once your rating has been verified you will receive your GreenPoint Rated certificate within two weeks.
